Website: <https://bit.ly/2UM0k7Y>

Full Stack Web Developer leveraging a background in software development. Self-motivated and driven problem-solver, passionate about clean and structured coding with great attention to details. Recently earned a certificate in Full Stack Development from the Monash University of Melbourne.

TECHNICAL SKILLS

HTML5, CSS3, JavaScript, jQuery, Mobile First Design, Node.js, Express, ReactJS, Redux, TDD, CI/CD, GIT, GitHub, MongoDB, MySQL, SQL Server, Bootstrap, API and RESTful web services, JSON, AJAX, The Command Line, Jest, OOP, Handlebars, Agile methodologies, Visual Studio, HP ALM, Experience in all stages of SDLC - from system analysis through to design, coding and testing.

PROJECTS

Music Application | JavaScript, HTML5, CSS3 **Lead Developer**

GitHub: <https://bit.ly/2wUec86> | Website: <https://bit.ly/2UvLwv9>

The data application retrieves information about a song or a singer from APIs.

- Led team of 4 and research data input and output from APIs.
- Used Bulma package for CSS3 formatting and jQuery for logic.

Password Generator | JavaScript, HTML5, CSS3 **Sole Developer**

GitHub: <https://bit.ly/3bCfbJ1> | Website: <https://bit.ly/3azMsnQ>

The application generates a random password.

- Developed UI to generate a password based on user user-selected criteria.
- Client side app with dynamically updated HTML5/CSS3 powered by JavaScript.

Weather Dashboard | HTML5, CSS3, jQuery, AJAX, JSON **Sole Developer**

GitHub: <https://bit.ly/2yi2UuY> | Website: <https://bit.ly/3crfYNn>

The weather dashboard with search functionality to find current weather conditions and the future weather outlook for multiple cities

- Used the [OpenWeather API](#) to retrieve weather data for cities.
- Coded AJAX to hook into the API to retrieve data in JSON format.
- App runs in the browser and features dynamically updated HTML5 and CSS3 powered by jQuery.

Inner Peace Project | MongoDB, Express, ReactJS, Node.js **Sole Developer**

GitHub: <https://bit.ly/2Uxqmx1> | Website: <https://bit.ly/2JsflkP>

The blog project to share knowledge about mind, body and spirit.

- Developed Front End using ReactJS to generate new blogs and add comments.
- The MERN app dynamically updates MongoDB and is hosted on Heroku.

RELEVANT EXPERIENCE

Computershare Technology Services

February 2000 - May 2012

Software Developer

Melbourne, VIC

Developed creative solutions for listed on ASX companies while maintaining development methodologies and processes. Upgraded core system processes to allow users to have more flexibility and control over the system.

Key Accomplishments:

- Led a group of 3 developers on AMP Data Warehouse project.
- Successfully completed ANZ Proxy Meeting project before deadline which helped company to calculate votes on the meeting correctly.

ADDITIONAL EXPERIENCE

Lotus Doors

February 2018 - Present

Joiner

- Multitasked across production lines to ensure maximum efficiency operationally.
- Worked and communicated effectively in a team of 10 people to meet group targets.

BMM testlabs

March 2016 – February 2018

Software tester

- Assessed technology integrity, accountability and functionality using regression tests to achieve 100% compliance with rules for the market.
- Reviewed source code using Visual Studio Code to ensure logic the program produce correct outcome for wins and losses.

DHL Express

May 2012 – March 2016

Courier Driver

- Performed tasks in a very fast-paced environment achieving 100% punctual delivery.

EDUCATION

Monash University, Melbourne

Monash Coding Boot Camp - Certificate in Full Stack Web Development.

Interim Technology Training Institute, Melbourne

Diploma of Business Programming.
